RESEARCH CONTRIBUTIONS INDEX

Entries in this Index are technical papers, short communications, award papers, educational reports, special papers, and topical articles. Algorithms are indexed separately; the "Index by Subject to Algorithms 1982" is on page 966 of this issue.

The KEY in each entry gives the year and volume number (8225), the issue number (which is also the number of the month), and the beginning page number.

The BIBLIOGRAPHY lists the entries in order of original appearance; each entry gives the title and the name(s) of the author(s).

The AUTHOR INDEX lists the entries in order of alphabetized authors' names. If there is more than one author for a paper, each author is listed separately in alphabetical order; therefore, in this section a single entry would not include co-authors' names.

The COMPUTING PRACTICES INDEX and the REPORTS AND ARTICLES INDEX list the year's entries in these respective categories.

The RESEARCH CONTRIBUTIONS INDEX groups technical papers and short communications according to the departments under which they were designated.
